

CONFERENCE NEWS

# PROMETRA FACING THE NEW WORLD ORDER OF HEALTH

FROM NOVEMBER 29 TO DECEMBRE 6, 2022

# PROMETRA INTERNATIONAL PRESIDENT SPEECH

Excellency Ambassador Andrew Young,  
United States Congressman,  
Former representative of the United States representatives on the United Nations Security Council,  
Chairman of the Andrew Young Foundation,  
Member of the Board of Director of PROMETRA International  
Dr. Valerie M. Rice,  
President and Rector of Morehouse School of Medicine,  
Privileged partner of PROMETRA International,  
His Eminence Agassa Sossa Guendeguehoungue III, President of the National Community of Vodou Cult of Benin,  
Ladies and gentlemen, leaders of grassroots communities,  
Dear healers,  
Dear Saltigui,  
Dear Kpohinto,  
Ladies and gentlemen,  
Honorable guests.

PROMETRA, which I have the honor to serve, is as much a structure for cultural research, scientific dissemination, as an instrument of international relations and Pan-African integration through the rehabilitation and promotion of our values of civilizations.  
When I speak of civilization values, I refer to science and the knowledge of healers, spiritual leaders, practical aspects of universal spirituality, forgotten, misunderstood or despised sciences that can contribute to human development.

Ladies and gentlemen,  
In this changing world, this ruthless world, this world at its crossroads, this world where the West, the only captain on board, leads us to an uncertain future, following a logic, a truth, a questionable rationality.  
Africa, mother of the first human breathing, mother of civilizations, of all civilizations, must wake up, look at old things with new eyes in order to build its future so as not to disappear.

Honorable guests,  
Ladies and gentlemen,  
Only a few centuries ago philosophers introduced a new way of thinking “I think, therefore I am”. It is the advent of individualism, to the detriment of humanism, which leads us today into a world of possessions and power.  
In Africa we say “I am, because you are”. We have no reason to exist without you.  
Then, in the 17th century, scholars like Cartesian created in the name of modernism, the Cartesian system, a real brake on the development of the human sciences. Here is an empty system, which has nothing to measure intuition, emotion, love.  
What do we have left without these values.  
Later, Louis Pasteur discovered bacteria and prescribed antibiotics to kill them. He forgets that without bacteria, there is no life on earth. Where are we today ?  
BACTERIAL RESISTANCE. Their pandemic will be worse than the Coronavirus.

Honorable guests,  
Ladies and gentlemen,

# PROMETRA INTERNATIONAL PRESIDENT SPEECH

Faced with these many challenges for the survival of our humanity, PROMETRA's modest contribution will be to lay the foundations for a more holistic science. We have been working on it for 5 decades.

As you know, the Cartesian system is based on knowledge and completely ignores knowing.

Africa through PROMETRA works towards the meeting between knowledge and knowing to humanize science.

This conference is an opportunity to lift some veils on the solutions we have reached in the context of the health and well-being challenges of our humanity.

Honorable guests,

Ladies and gentlemen,

This meeting will be a historic opportunity to present to the national and international scientific community the research results we have achieved.

We take the liberty of saying that Africa has curative solutions to several viral, individual, endemic or pandemic diseases.

You know, modernism and its system cannot obtain these results, which are based on another logic, the African one, another truth, the African one, another rationality, the African one. This rationality, logic is summed up in one sentence "In Africa we do not kill, we remove". Stop killing pathogens, remove them.

If the international scientific community tries to listen, hear, look and see, we will fundamentally change all health research assumptions on a planetary level.

In this world at a crossroads, this world in full mutation, Africa can bring nothing to the new economic order, nothing to the new military, financial, political, geostrategic order... But Africa will have to mark its time by the implementation of a NEW WORLD HEALTH ORDER.

The strength of our message serious, rigorous, dramatic.

May the instinct and genius of men guide us to meet the challenges of our time, and find solutions to the various obstacles that threaten and jeopardize human being and the future of humanity.

PROMETRA calls with all his wishes on each other, all those of good will who know how to listen in this screaming world, to join us in mutual respect and mutual trust to lay the foundations for a sustainable and humanizing health system.

Finally, on behalf of PROMETRA International, which I have the honor to serve, on behalf of grassroots community leaders, the source and inspiration of our achievements, I would like thank our research and support partners Morehouse School of Medicine and the Andrew Young Foundation and finally, our special thanks to the Presidents of our national chapters, who are fighting unconditionally, day and night to maintain the torch of PROMETRA lit despite the lack of support, with an undivided determination to contribute to the rehabilitation of our values of civilizations.

## A MINUTE OF PRAYER FOR MEMBERS OF PROMETRA CALLED TO GOD

My beloved brothers and sisters, in recent years, several members of our network have moved to the Eternal East for several reasons:

- Some, because of multiple pandemics or other diseases,
- Others by fighting for the honor, dignity and pride of our Africanity, fighting against terrorism, exogenous and endogenous, multiple and multifaceted invasions, the mafia, neo-colonialism and the plundering of our values of civilization .

Death is not an end, it is like a closing door. A door that closes is followed by another that opens. This stage of our life in no way threatens our spiritual existence. Death is the door of life which gives access to Fetomin, access to the world of the ancestors. Our ancestors will lead our departed brothers to their eternal life.

Death reminds us that we must go even further, and that it is the very condition of progress and of life.

Regret, regret, regret, but they will light our way, and we will always accompany us in our commitment to allow our continent to fully play its role.

Let's pray.

# PROMETRA INTERNATIONAL LEADERS

DR ERICK GBODOSSOU  
PRESIDENT OF PROMETRA INTERNATIONAL

Dr. Erick GBODOSSOU is the President and founder of NGO PRO.ME.TRA. International (Promotion of Traditional Medicines), Director of CEMETRA (Experimental Center fir Traditional Medicines) of the Fatick region, Senegal.

He is a consultant and resource person for several international organizations for protection, promotion and valorization of natural health and traditional knowledge and knowing.

Holder of 18 patents, initiator of collaborative research with American and international universities and institutions, Dr. Erick GBODOSSOU is the author of some fifteen books dealing with multiple and varied themes, ranging from culture to research itself, including slavery, ethics, science and development in general.

He is since 2021 The king of Tado civilization, becoming therefore King Xwla Xolugbo Meto Ahoussan IX.

Dr. Floyd, Director of Family Health at Atlanta Georgia, Ex-member of the Ford Foundation, staff member of Morehouse School of Medicine.

DR VIRGINIA D. FLOYD  
VICE PRESIDENT OF PROMETRA  
INTERNATIONAL

Andrew Young is a native of New Orleans, Louisiana, USA. He attended Dillard University, Howard University -- where he was a member of the varsity swimming team -- and Hartford, Connecticut Theological Seminary.

He was ordained as a minister in 1955, and his first pastoral assignment was deep in rural Southwest Georgia in Thomasville in Thomas County. He became a member of SCLC and began working with Rev. Dr. Martin Luther King, Jr., and the rest is

EXCELLENCY AMBASSADOR ANDREW  
YOUNG  
BOARD MEMBER OF PROMETRA  
INTERNATIONAL

# PROMETRA NATIONAL CHAPTERS

MRS. MIEZI BERNADETTE

# PROMETRA NATIONAL CHAPTERS

DR CLAIRE DUFFOUR JAILLET  
PRESIDENT OF PROMETRA  
FRANCE

Co-responsible for a place of care and healing, where natural methods are mostly used. At the school of traditional Africa, our choices in terms of life and health are based on a holistic, multidisciplinary and intercultural approach to people, in a search for harmony with our environment. The teaching link that has existed for 30 years with Dr. Erick Gbodossou, President of Prometra International, has created a bridge of exchange of practices and knowledge between our contemporary approaches to health and traditional African practices.

MR. NADOR ANOUMOU TOGBEVI  
PROMETRA FRANCE

# PROMETRA NATIONAL CHAPTERS

Martha Njama worked as an accountant with a Government Parastatal organization; Industrial and Commercial Development Corporation (ICDC) from 1981 to 2000 (20 years). She graduated for a Bachelor of Business Administration (BBA) in 1994 and Master of Business Administration (MBA) in 1998.

She joined Prometra Kenya in 2003 when it was at the formation stage and is one of the founders of the organization which was founded and registered as an NGO in 2004. She has held different positions within the organisation; Treasurer, Secretary and she is the CEO of the organization, a position she has held since 2005

MRS. Martha N. NJAMA  
PRESIDENT OF PROMETRA KENYA

Enock Baraka Jefwa is a trained Cultural and indigenous knowledge youth champion, chairperson for Indigenous Knowledge for young generation in Kilifi County, human rights defender, trauma healer counselor, mentor, civic educator and an advocate for sexual reproductive rights.

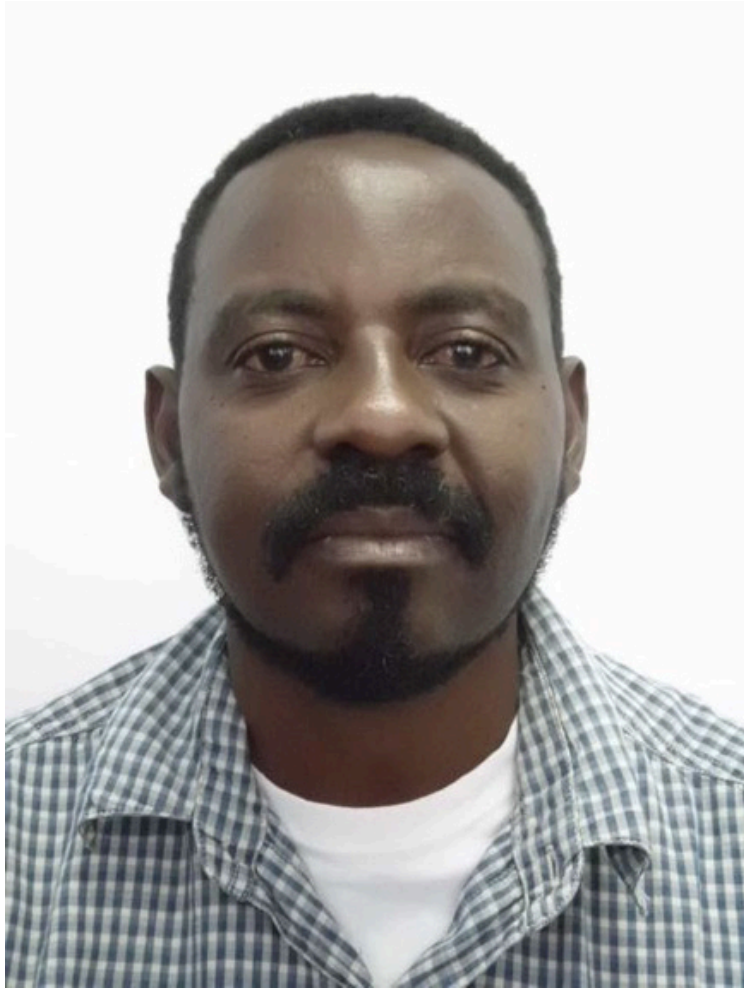

A two awards winner, 2020 and 2021 youth champion of the year awarded by Connect To Retain Organization (CBO) and Haki Yetu Organization (NGO) as the most active Human Rights defender and young generation champion in Kilifi County

A Committee Member of PROMETRA International representing young generation.

I inspire and motivate young people to be responsible citizens in society through tradition and cultural civic mentorship programs. I'm an advent proselyte of the divinity that the tomorrow we want is determined by the present-day generation of young people.

MR ENOCK JEFWA

# PROMETRA NATIONAL CHAPTERS

MR JOSHUA BOMU

Mr. Bomu is an accomplished Behavior Change Communication (BCC) expert and holds a degree in Clinical Medicine and Surgery from the School of Clinical Medicine in Mombasa, Kenya.

Mr. Bomu has progressively acquired knowledge and practical experience in organizational and project development and management, strategic behavior change communication (SBCC), strategic planning and advocacy training over three decades.

Mr. Bomu's experience ranges from training trainers in facilitation methodologies in government institutions, local and international non-governmental organizations to providing behavior change communication skills to adopt the research behaviors of health in Kenya and South Sudan. He is currently the Managing Director of Strengthening Community Partnership and Empowerment (SCOPE) and Director of Prometra - Kenya. He was an innovator in designing projects targeting youth behavior and overseeing their successful implementation.

He has also been instrumental in mobilizing traditional practitioners/healers to be recognized and registered by social services in Kenya.

Mr. Bomu has consistently emphasized health promotion programs and governance through behavior change communication in all of these engagements.

He has demonstrated his ability to use different facilitation methodologies from various sources that allow participants to develop communication skills that are easy to spread to target beneficiaries.

# PROMETRA NATIONAL CHAPTERS

DR.DJIBRIL COULIBALY  
PRESIDENT  
PROMETRA MALI

Originally from Beledugu, a historic area of Mali renowned in the field of traditional knowledge, Dr Coulibaly Djibril is Pharmacist researcher Head of service "Contact with healers" at the Center for Traditional Medicine of Mali from 1998 to 2005. Since 2006, Director of the Regional Center for Research in Traditional Medicine (CRMT) Mali. Founding member and President since 2003 of the Association for the Promotion of Traditional Medicine in Mali (PROMETRA Mali). With his certification in ethics, Dr. Coulibaly is the architect of the development and validation of the national policy of traditional medicine in Mali and the architect of the organization of the traditional health system in Mali. Principal investigator for more than two decades of several research projects on the scientific valorization of traditional medicine, Dr. Coulibaly has to his credit several Phytomedicines improving the state of health of our populations.

MR MODIBO FOFANA

Modibo Fofana member of Prometra since 2008. Holder of a Master II in communication and a master's degree in sociology, he is president of the online press in Mali. He is also a promoter of online media and a regional newspaper (print media). His passion for African knowledge, in particular traditional medicine, was the driving force behind his choice of the theme "problems of collaboration between traditional and modern medicine" as a dissertation theme in 2008. He is involved with Dr Djibril Coulibaly, President of the Prometra Mali in the promotion of African knowledge through advocacy and training. "We are resolutely committed to making the cultural diversity of Mali its true wealth to be preserved at all costs"

# PROMETRA NATIONAL CHAPTERS

DR OMAVI F. BAILEY  
PRESIDENT PROMETRA  
USA

His experience and training range from initiations in sacred temples to study at the feet of traditional African healers and spiritual leaders. However, his formal training as a somnologist, epidemiologist and physician also allowed him to connect his traditional knowledge with his Western training to serve patients through his clinical practice. Dr. Bailey currently holds board certifications from the American Board of Family Practice and the American Academy of Sleep Medicine, as well as the American Board of Obesity Medicine. His extensive knowledge and enthusiasm for natural and new treatments for chronic and "incurable" diseases influences his use of innovative natural therapies as an intervention to treat and prevent chronic diseases and restore bio-psycho-spiritual harmony with his patients.

PR. MAYS IMAD

Mays Imad, Ph.D., is an assistant professor in the Department of Biology at Connecticut College and a principal investigator at AACU STEM.

Mays received her undergraduate training in philosophy at the University of Michigan, focusing on the philosophy of science and consciousness. SUMMARY OF THE PRESENTATIONS  
DURING THE CONFERENCE

## **BENIN by Mr. Emmanuel AGBIKOSI**

Significant actions

- Meeting with the program coordinator
- Acquisition of a new site to house the museum and headquarters of Prometra Benin
- Topographic survey of the site for the projects of Grand Popo (the spiritual city, the ways of remembrance and the works of scientific research)
- Intermediary between Prometra International and the local authorities, necessary for the realization of the projects.

Proposal for the New World Order:

- New legal and administrative organization
- Creation of a virtual library
- Creation of a newsletter, to avoid repetitions and make useless research by harmonizing the results.

# **BURKINA FASO by Dr. Kevin OUEDRAOGO**

## Context of Traditional Medicine in Burkina Faso

Improve the knowledge and organization of traditional healers within society:

- By supervising the groupings and the individualization of traditional healers for more synergy.
- By working concretely with networks and traditional practitioners and by promoting improved traditional medicines.
- By strengthening the capacities of the TPS on good practices for harvesting and drying medicinal plants.
- By promoting the cultivation of TPS medicinal plants on good practices for the cultivation of medicinal plants.

Results :

- Traditional practitioners communicate better, participate in capacity building
- They also reinforce the methods of conservation of phyto products, cultivate plants of medicinal plants in the botanical gardens and conservatories
- They apply best practices for harvesting, drying and preserving plant raw materials.

# **CAMEROON by Edward FAI FOMINYEN NGU**

- 20 years of existence
- Spiritual promotion of traditional medicine with the support of the Cameroonian government.
- Promoting spirituality and connection with our ancestors, to promote the development of African countries

# **FRANCE by Nancia AVISOA, Claire DUFOUR-JAILLET and Anoumou NADOR**

Presentation of the representation (co-presidency, location, temple)

Presentation of the different activities:

- The care of African tradition provided by Claire DUFOUR psychotherapist and guardian of the temple, by Fatoumata Néné BANGOURA traditional practitioner, with the punctual support of Emmanuel AGBIKOSSI (Prometra Benin)
- The Circle of Healing through Dance and Trance
- Summer days (exchange of practices and knowledge and General Assembly)
- The History, Memory and Interculturality Circle
- The Salutogenesis and Health Circle
- The Spirituality and Traditions circle

Présentation de l'organigramme, des texts fondateurs, des new orientations

Présentation des perspectives pour 2023.

## **PROMETRA GABON BY MR AMAVI AYAO (AMELAGAN)**

PROMETRA Gabon did not fail to highlight the achievements they had to make, namely, among others:

- Involvement of healers in activities related to HIV AIDS-EBOLA-DIABETES-MALARIA-TUBERCULOSIS-COVID 19...
- Work with REGOSIDA with civil society
- Organize the actors of the Med-Tra the J'AMT
- Work with WHO
- With the Ministry of Health
- Supervision of students for thesis
- Permanent broadcast on TV and radio on topics related to traditional medicine
- proliferation of drug recipes, which leads to self-medication

The president of PROMETRA Gabon also spoke of some difficulties they encountered, namely the lack of serious supervision of practitioners, or the explosion of fake healers which creates mistrust at all levels.

# Guinea Bissau Mamadou Biaí

1. For nine years without an international Prometra conference, Prometra Guinea-Bissau has been researching the following plants
2. No support or funding from the Ministry of Public Health to NGOs. But our headquarters will be in Guinea Bissau, together with the national health institute (INASA).
3. Yes, research is done at the National Research Institute (INEP).
4. There is work by the Ministry of Public Health in the field of traditional medicine.
5. Yes There is coordination by the Ministry of Public Health through the directorate of community health and traditional medicine.
6. In Guinea-Bissau there are two international organizations working in the field of traditional medicine which are CARITA ONG CATOLICA and VIDA ONG Italian volunteer for African development.
7. There is no company that helps non-governmental NGOs in the food supplement provided.
8. The entities that Prometra intends to later collaborate with in the financial domain for the research of the new integration in the world of traditional medicine are: UNICEF; ENDA THER MUNDO; INASSA; WHO, AND UNDP.
9. Yes, we have contacts with organizations in the world that intervene in the area of traditional medicine Africa Europe Asia Etc..

# **MALI by Dr. Djibril COULIBALY**

PROMETRA-MALI has as objectives the study, the support and the organization of African Medicines and Treatments in Mali with a view to its articulation with the conventional health services at the base of the health pyramid as well as the enhancement of our cultural identity.

Goals :

- Strengthening collaboration between traditional practitioners and conventional health practitioners
- Organization of traditional healers
- Involvement in local policy decisions
- Participation in public events
- Support for organizational development of TPS
- Research assistance (inventory of rare wild plants for medicinal, food and craft use)
- Assistance in subscribing to calls for projects aimed at associations of traditional healers.

# MARTINIQUE by Karelle MOGADE

The activities offered are oriented towards healthy food hygiene, food plants (herbal teas, juices, syrups, etc.) and natural body care, eg massage.

Our different activities:

- A garden, source of well-being and rejuvenation, maintained by Gérard JOSEPH
- Transmitting the love of tradition to children
- Interactive programs (Radio active, Radio handi FM, Radio Nord FM, Radio Gospel Martinique REM)
- Useful plant recognition workshops in the homes of the elderly and other audiences to familiarize themselves with the plants that grow in front of our door.
- Well-being workshops for reconnecting with mother nature (contact with trees, the energy of water)
- Dried herbal teas and syrups at the service of our health by Karelle MOGADE
- The publishing house of Clémire JOSEPH

# UGANDA by Dr SEKAGYA Yahaya

- School in the forest 1/week every Wednesday. Exchange and transfer.
- Challenges: sustainability of the association (material, moral and financial) implementation of strategy by the creation of the institute of Dr. Sekagya
  - Three sectors of the institute:
    - o The garden (food and medicine) products are sold in markets for financial contribution,
    - o Manufacture of machines useful for the transformation of their product, machines certified by the official authorities (precision scales, industrial mixer)
    - o Demonstration of their processed products
- They have a conference room, dormitory room to accommodate up to 150 people
- Spiritual and cultural aspects are also present
- Research and collaborations, product protection marketing and product advertising
- Financial partners: universities in Uganda, University of Zurich

## **DRC by Pr LELO**

- Tribute to those who died during the conflict with a neighboring country.
- Endogenous knowledge that deals with the birth and growth of community life and death (Unesco, FAO, Prometra)
- A plant is a tree of life by itself (roots, trunk, bark, leaf)
- Geographical presentation of the DRC
- History of the creation of the RDC Prometra representation
- Presentation of the country's difficulties in the face of terrorism and diseases such as Ebola, AIDS, and the research that Prometra RDC has been implementing since their mobilization
- Distribution of an experimental Manacovid product.
- Presentation of different endogenous knowledge that is poorly known to African youth and comparison with Beninese art, music, dance and clothing.
- Obstacles observed: anti-values encountered, acculturation (use of our identity), imported wars, religious resistance,
- Products produced: ManaLaria, ManaCovid

# SENEGAL by Dr. Boury NIAN

- Video spot, tourist promotion of Senegal,
- Presentation of the activity report between 2020 and 2022
- Composition of the association (three people), 22 years of experience in traditional medicine
- Goals :
  - o Popularize the policy of Prometra International
  - o Contribute to the introduction of traditional medicines in our national health systems
  - o To be the voice of healers in Senegal,
  - o Train traditional healers with their populations
  - o Moving towards improved packaging of herbal medicines
- Activity: the XOY (public divination ceremony) organized in Malango, which also brings together other associations such as the association of diabetics of Mbour, the association of HIV survivors, the association of traditional healers of Djegueume of Sandiara
- Explanation of the various works implemented from own funds for the expansion and opening of reception facilities
- The field of medicinal plants of Diakhao qjui includes 1500 plants of 72 different species spread over 6 hectares

## **TOGO by Dr. Komlavi ESSEH**

- Office meetings held during the past year, including 4 by video
- Courtesy visit to Prometra Benin
- Resumption of the activities of the association since 2021, presentation of the members of the office
- Launch of the Care project in January 2022 by the president of Prometra International
- Participation in participatory herbalization in partnership with WANNPR TOGO in Lomé
- Training of PMTs in 2 health regions with 115 traditional healers
- Participation in the day of traditional medicine, at the invitation of the WHO and the COA
- Organization of webinars as part of the celebration of the JAMT
- Procedure for obtaining registration and receipt of Prometra TOGO
- Participation in a TV program on the place of traditional medicine in the treatment of breast cancer
- Discoveries :
  - o Recipes valued in functional foods by PMTs: TOKOU, ITA IRON, ABLAVI POWER, MEDOLOME (FIGHT AGAINST AIDS INFECTIONS), MIRACRATA (anti-poison)
- Constraints and difficulties:
  - o Lack of material and financial resources
- Expectations of the seats:
  - o Assistance in obtaining funding
  - o Technical support through regular training

## **KENYA , virtual connection with President Martha NJAMA and Dr Amos LEWA MWAVITA**

- Discovery of drug molecules against AIDS and Malaria
- The Covid-19 was an opportunity because many patients but little care.
- Meeting of all health actors, which led to the inclusion of traditional solutions. Like for example the recipe: lemon, garlic and a mixture of plants that has been effective.

# **USA by Dr. Omavi BAILEY and Dr. Mays IMAD**

## **Two short presentations**

### **1st presentation by Dr. Omavi BAILEY**

- Missions: promoting traditional medicine and African tradition in general, preserving African civilization
- Future: new innovative ideas, meeting the development challenges of the association
- Dr. Omavi BAILEY, new president since covid
- To be a bridge to connect Africa and the world, as well as a bridge with our ancestors.
- Major Project: Paths of Remembrance
- Working with black academics in the USA
- Financial aid Uganda, Benin, Prometra international and Zimbabwe
- Strengthen communication (ipad pro, virtual office, communication, social networks
- Opportunities: young people are looking for African culture, young black people are leaving churches to go towards spirituality, there is no longer any need to teach them the importance of holistic medicine, in particular through medicinal plants.
- Essential to exchange African knowledge with the diaspora through social networks and the net
- Influencers have an important place, in particular Akon, native of Senegal, Lauryn Hill...
- Festival of return to Ghana, but it unfortunately turns into business
- Strategy to be implemented: Crowdfunding (crowdfunding)
- Financial assistance for Prometra Uganda:

## **2 nd presentation by Dr. Mays IMAD: Cardiac coherence**

- Report to calculate people's emotions, measure energy of human being by heart scanner
- Measurement of the harmony and coherence of human energy related to its emotional activity
- Demonstration of the impact of knowing the history of their ancestors, to fight against the traumas of racism and discrimination.
- The state of anxiety literally drops after meditation and relaxation exercises and knowing their stories.
- The connection with the ancestors favors a harmonization of our energies.

# **ZIMBABWE by Mr. MUNYENGETERWA**

- Set up in December 2018, just before the Covid-19 epidemic. Despite this, implementation of actions to fight against the epidemic.
- Tribute to recently deceased President Counselor who personally funded Prometra Zimbabwe projects
- Thanks to Prometra International, for the condolences sent, as well as Prometra USA for their assistance during these difficult times.
- Prometra Zimbabwe is one of the largest associations in the country through education programs with universities. Acquaintances and promotions are made on social networks, as well as in newspapers and TV programs.

# DAKAR DECLARATION

From November 29 to December 6, 2022, PROMETRA International and its national chapters held their meeting in Dakar, after which several conclusions and recommendations were adopted in the form of a Dakar declaration.

- Considering the evolution of our planet towards a new world order
- Considering the power of the Western oligarchy and the risk of the extinction of humanism, to the benefit of belonging and power
- Considering the risks of growing poverty of African populations, exploited and plundered by the West
- Considering the extension of terrorism in Africa, as a mode of white domination
- Considering the advent of multiple pandemics, which have highlighted the limits of conventional medicine,
- Considering that serious research has made it possible to note that African medicines constitute the hope for the health and well-being of our humanity,
- Considering that collaborative research, carried out for more than 15 years, between PROMETRA and Morehouse School of Medicine, has made it possible to discover new molecules, new proteins, as curative solutions for several diseases, incurable by conventional medicine
- Considering the limits of the Cartesian system and its therapeutic mode which leads to addiction, resistance to pathogens and the creation of iatrogenic diseases of concern
- Considering that the system of knowledge and knowing put in place by African medicine remains the hope for the health and well-being of our humanity
- Considering that the term “traditional African medicine” is demeaning for Africa

The participants in the PROMETRA international meetings recommend:

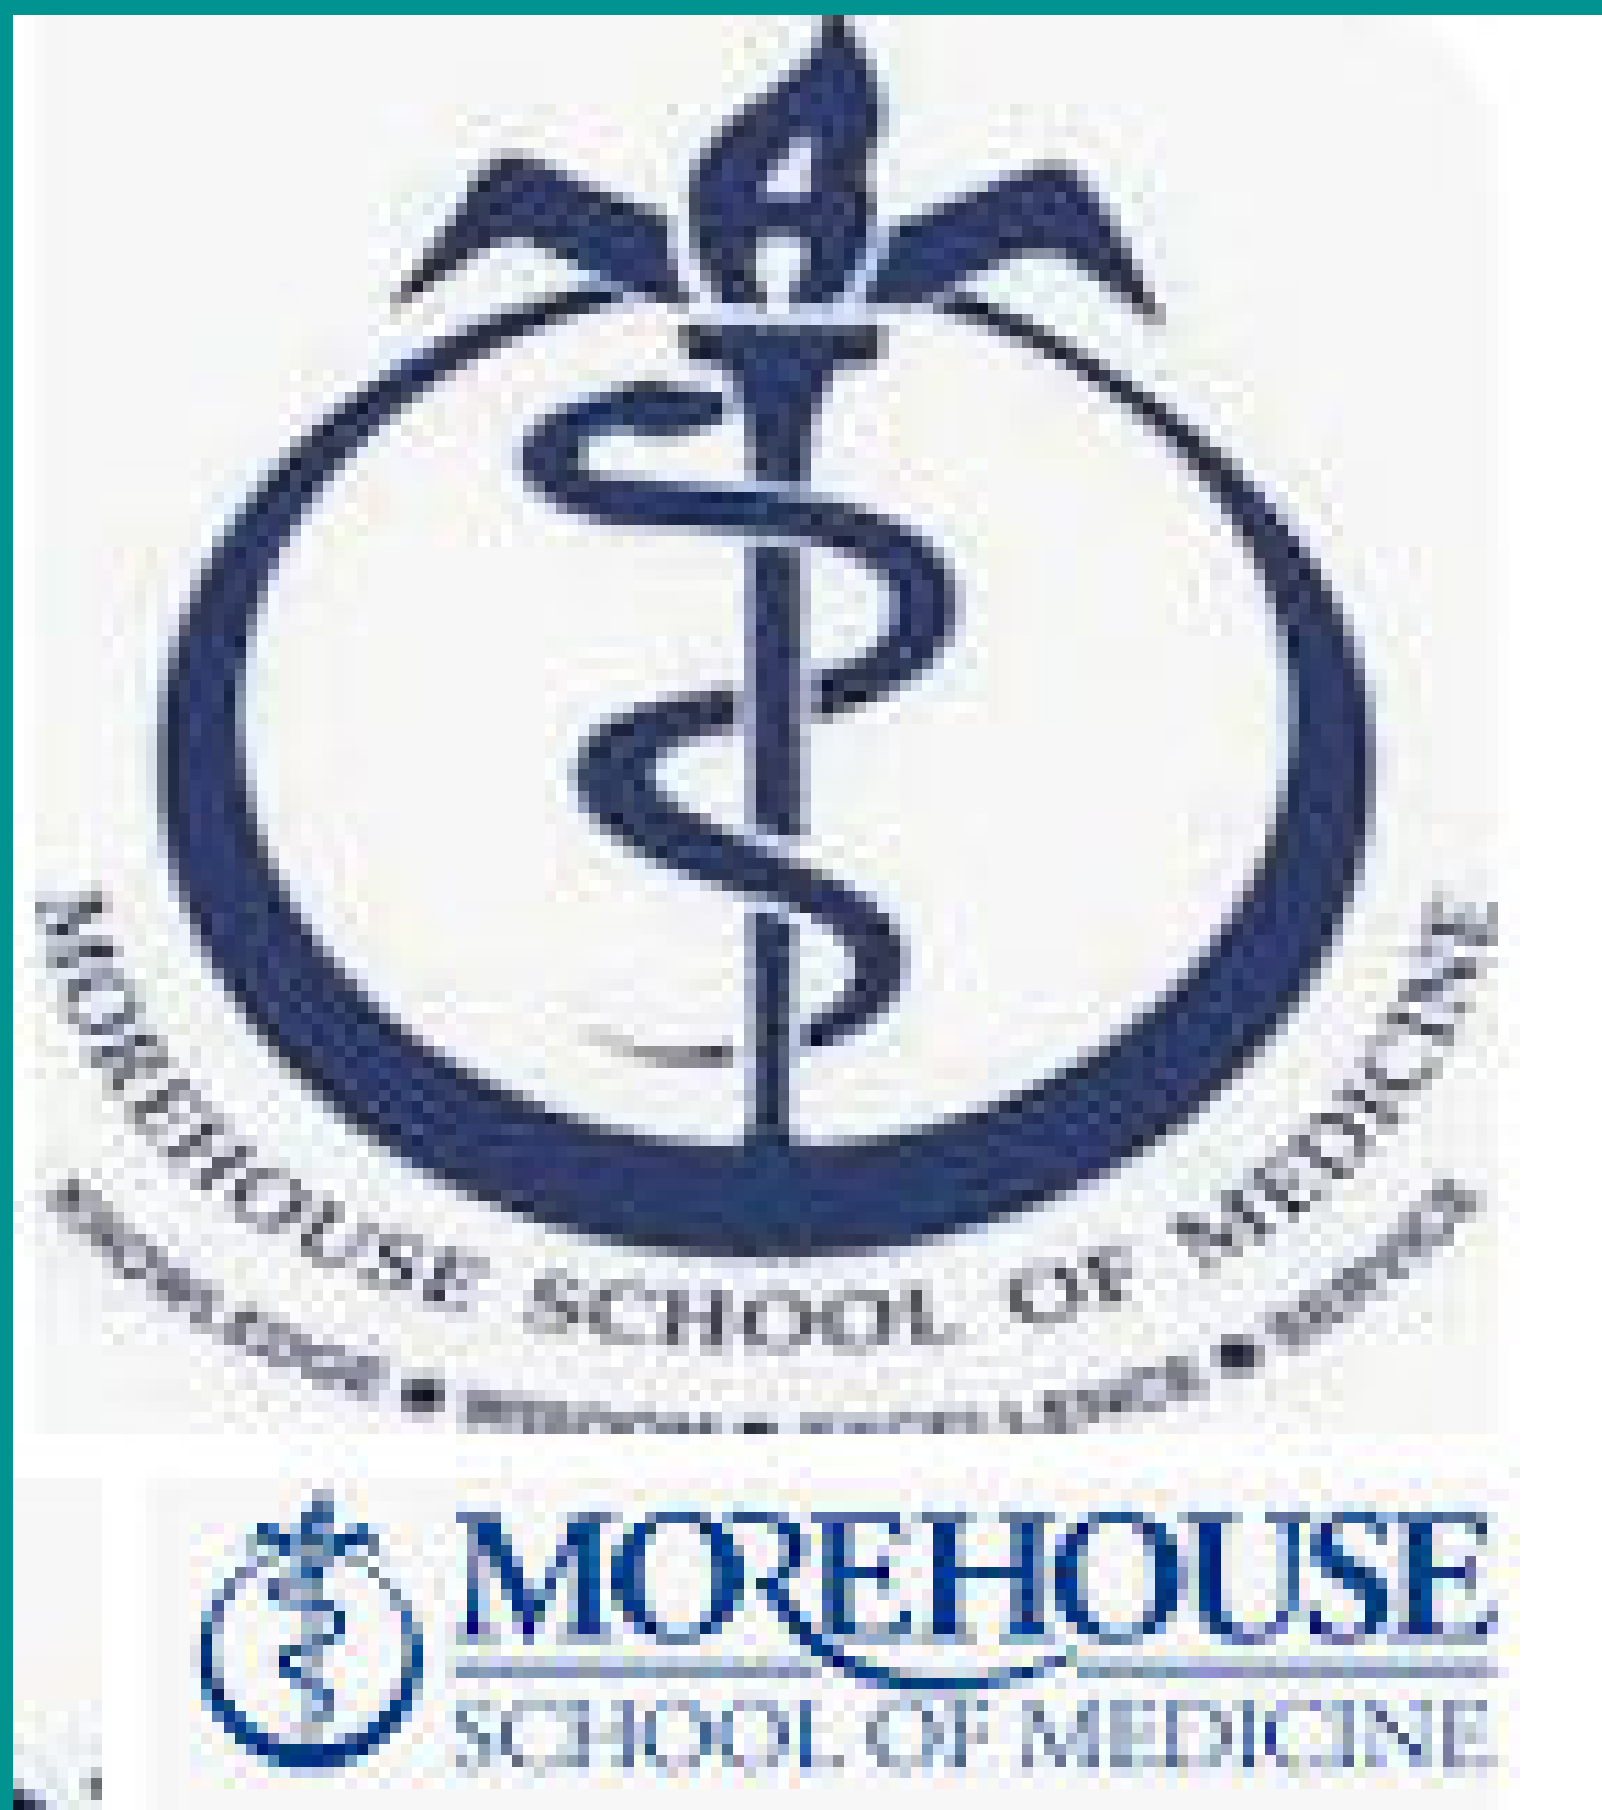

- 1) The PROMETRA cycle acronym now means “PROMOTION OF AFRICAN MEDICINES AND TRADITIONS”
- 2) Congratulates the national representations for their remarkable work, and their unwavering commitment to keep the torch lit by all means

- 3) Encourages our respective countries to develop and promote our medicine and our African traditions, through collaborative research and the development of community centers such as the Bouyidja center in Uganda
- 4) Transform the Experimental Center of African Medicine (CEMETRA) of Fatick, into a care center of African medicine and cultural and religious encounter
- 5) Creation of an African Center for Research and Exploration of Knowing (CARES) in Grand Popo in Benin, belonging to the PROMETRA network, and opened at Morehouse School of Medicine, to serve as its pilot center, its establishment in Africa and to serve as a link with its natural products research center
- 6) Express their gratitude to the mayor of Grand Popo for granting PROMETRA land with an area of 210 hectares, to host CARES and other projects, and encourage it to take all administrative measures, to secure said parcel
- 7) The PROMETRA network will have to make every effort to be the leader of the new world order for the well-being and health of our humanity
- 8) Integrate and guarantee the transmission of African knowing and traditions to future generations.
- 9) Take all strategic, security measures to enable PROMETRA to protect African knowledge and knowing systems, in order to lay the foundations of a human science, to the detriment of a science of belonging and power
- 10) Set up “the temple of ancestors”, “the way of remembering” and “the spiritual connections” projects, in Grand Popo, to heal the wounds linked to slavery, colonization, neo-colonization, terrorism, buried in our universal consciousness. Rehabilitate spirituality at the heart of our lives, to lead people and the world towards a better and more enlightened humanity

- 11) PROMETRA will make every effort to enable, expand and encourage the extension of our network
- 12) Recommends the visit of the site, and the commitment without delay of the start of the various works
- 13) Involve grassroots community leaders to fully play their role as IEC (Information Education Communication) agents in their community
- 14) Encourages the wider use of local medicines from the African pharmacopoeia
- 15) Encourages governments to prioritize the protection of sacred sites and forests, identified by spiritual leaders, taking into consideration concerns related to climate change.

# OFFICIALS SPONSORS

# PROMETRA PROJECTS

The Way Of Remembering is an exciting and practical participatory immersion in the culture, spirituality and history of Benin and Africa. It allows the children of Africa to rediscover mother earth Africa and to walk in the footsteps of their ancestors.

The Temple of the Ancestors offers each participant a spiritual reconnection with all their Ancestors through appropriate rites and rituals.

# PROMETRA PROJECTS

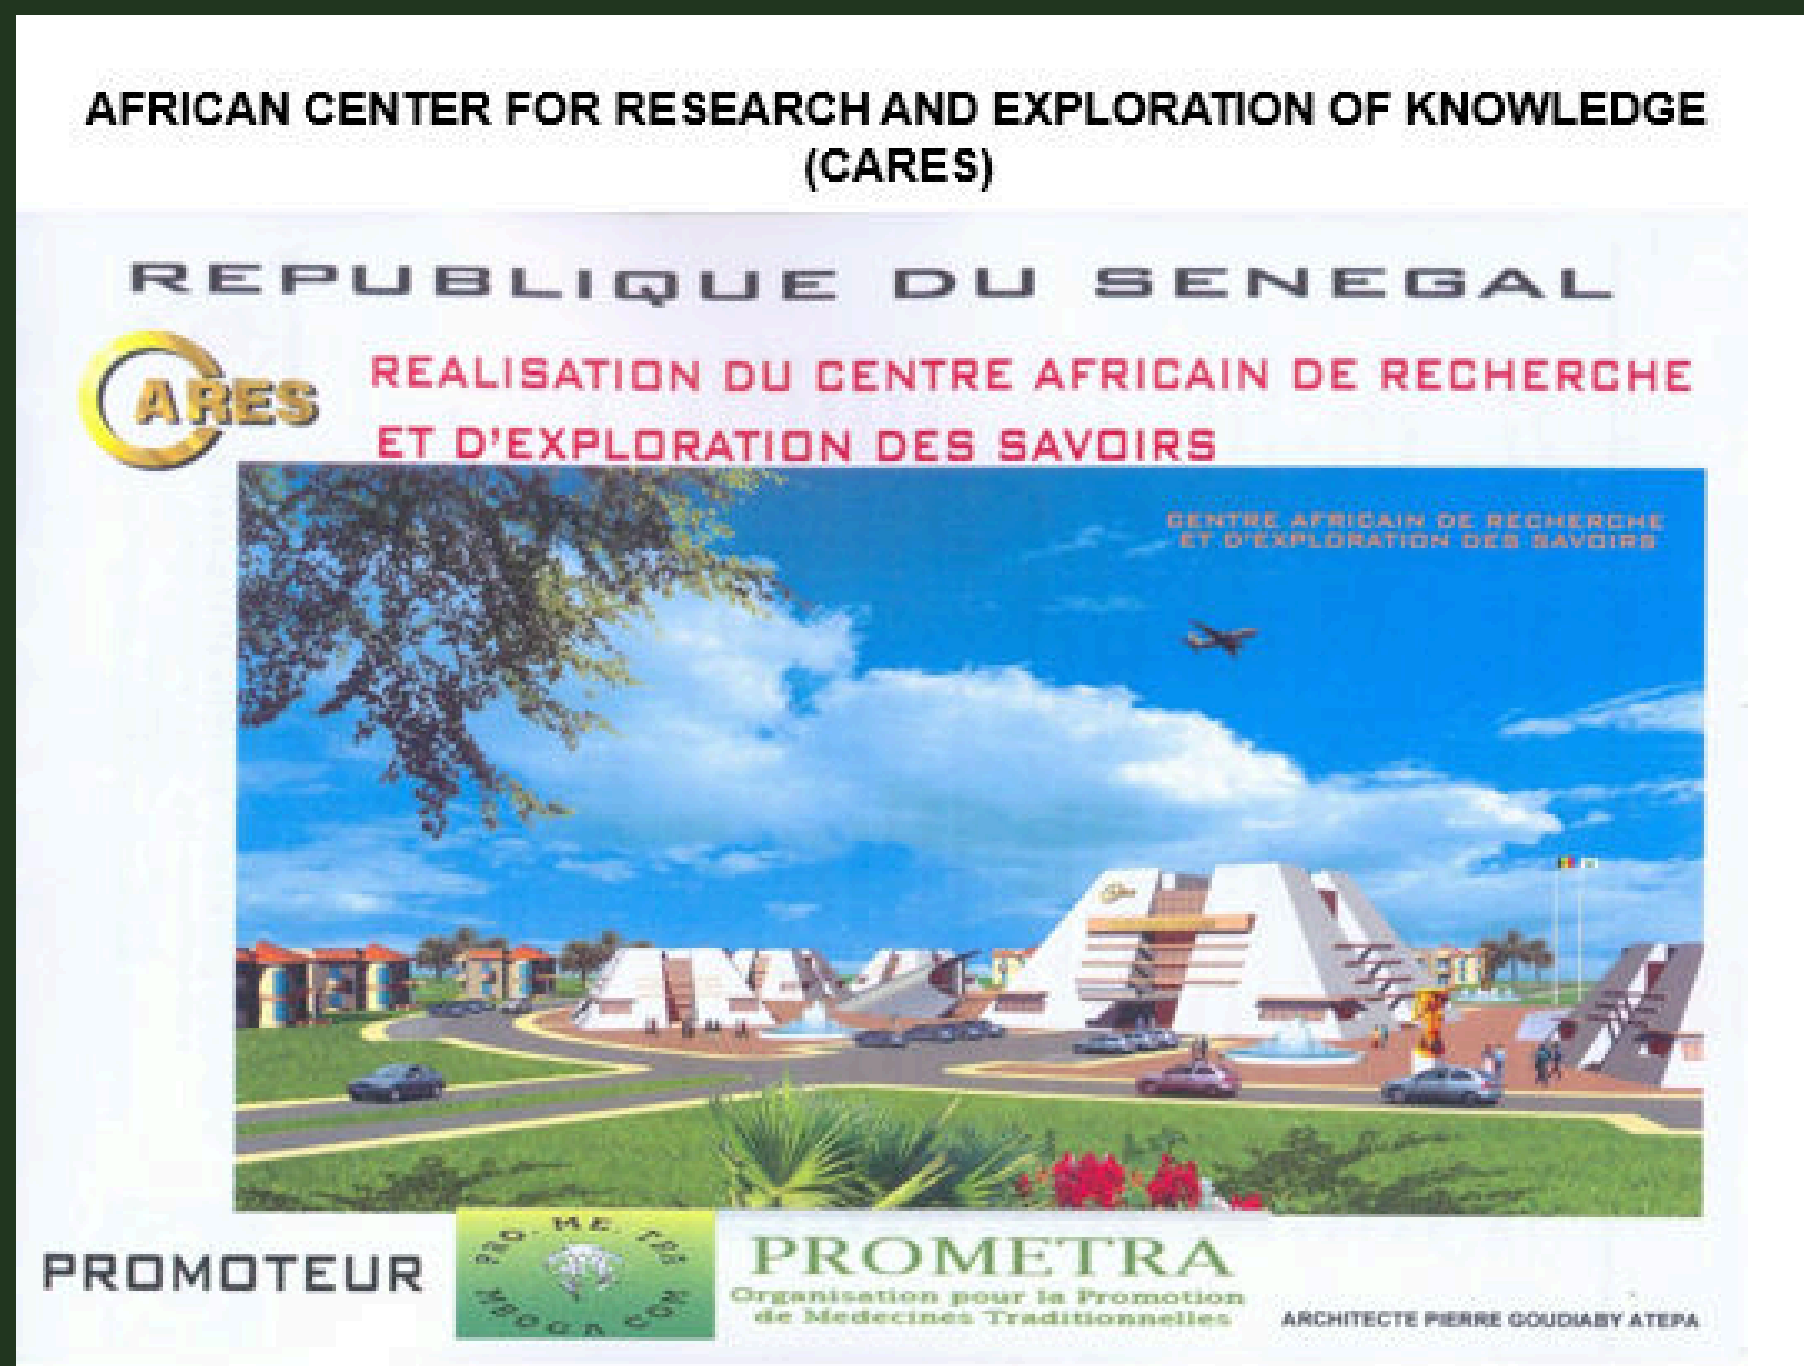

The ONLY Door of Return of the World located in Benin, it represents the return of children separated from their parents by slavery to the land of their ancestors. Formerly we were talking about a door of no return, today the Diaspora can return home through the BIG door, the DOOR OF RETURN.

The spiritual city is the only city in the world which shelters ALL the 256 universal spirits. A spiritual place of pilgrimage and the answers to the imperious need to put universal spirituality at the heart of Humanity.

# PROMETRA PROJECTS

CARES is the connexion between knowing and knowledge in order to lay the foundations of a more human science. Science that will lead people and the world towards a better and more enlightened humanity.
